

Istruzioni per l'utilizzo del software "Publish or Perish"

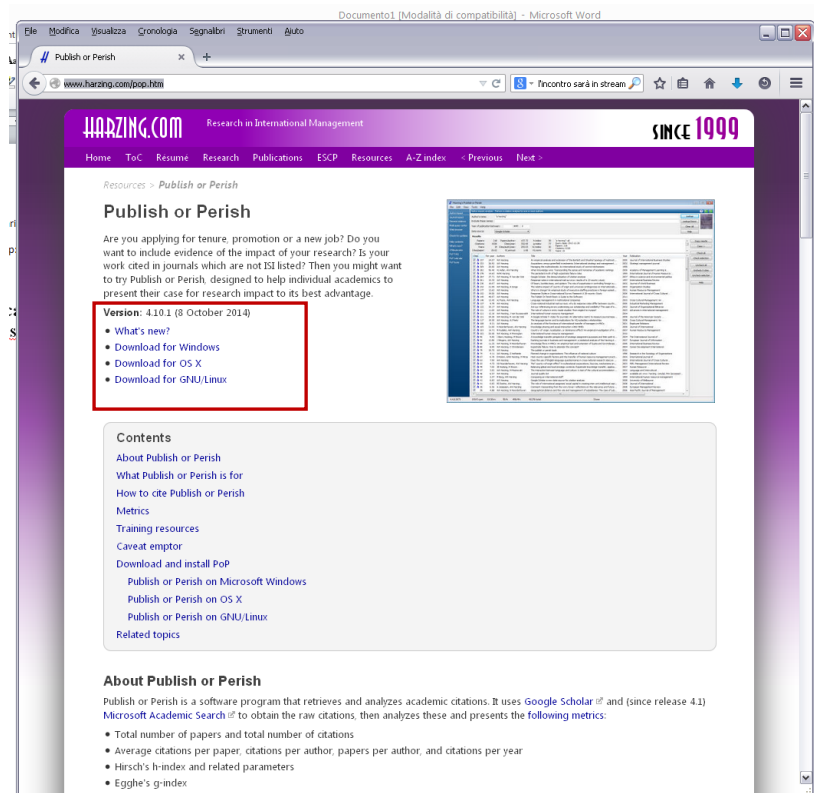

Il software "Publish or Perish" è uno strumento utile al calcolo dell'h-index contemporaneo. Il software considera in automatico come fonte dei dati Google Scholar.

È possibile però utilizzare le banche dati **Scopus** o **ISI** per il calcolo dell'h-index contemporaneo. Scopus e ISI sono infatti le banche dati da utilizzare per il calcolo degli indicatori per la valutazione della qualità scientifica del responsabile dei progetti PRA (come previsto dall'art. 6 del bando emanato con D.R. n. 1423 del 23/12/2014, che ricalca quanto definito dalle disposizioni ministeriali relative all'Abilitazione Scientifica Nazionale).

Di seguito le istruzioni.

Scaricare il programma Publish or Perish dal link:

<http://www.harzing.com/pop.htm>

Scaricare il programma relativo al sistema operativo utilizzato

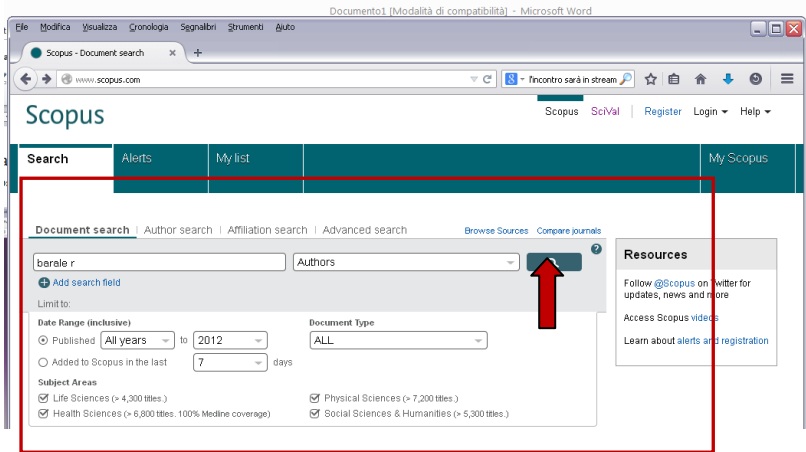

Per la creazione del file delle citazioni di SCOPUS o ISI:

SCOPUS:

andare sul sito <http://www.scopus.com/>, inserire nella maschera "search" il nome dell'autore e cercare nel menù a tendina di destra "authors"

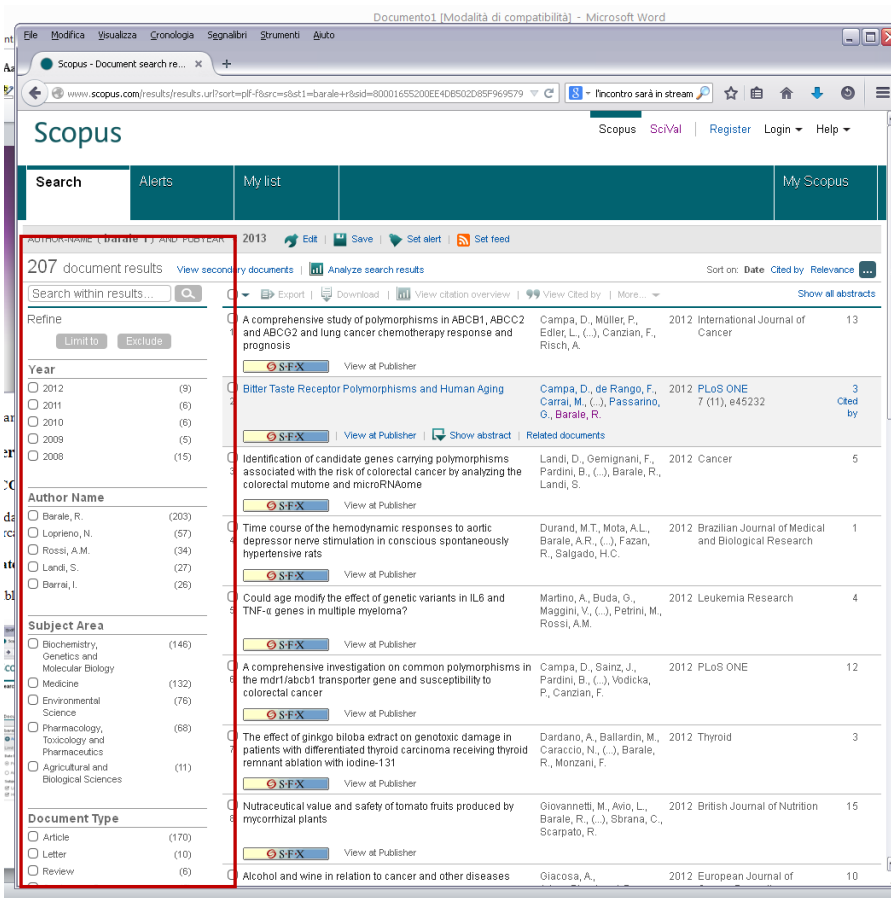

Date Range:

Published: all years to 2012

Comparirà la lista delle pubblicazioni relative all'autore.

Utilizzare i filtri della Colonna di sinistra per eliminare eventuali pubblicazioni che non sono riferibili all'autore

Per esportare la lista delle pubblicazioni

Selezionare tutti i propri lavori spuntando la casellina “select all”
